INFORMATION DISCLOSURE STATEMENT

Sir:

Pursuant to 37 C.F.R. §§1.97-1.98, the undersigned would like to make the following prior art references of record in the above-identified patent application. The undersigned believes that some of these references may be material to the examination of this application and in respect of which there may be a duty to disclose in accordance with 37 C.F.R. §1.56.

While this Information Disclosure Statement may contain material information pursuant to 37 C.F.R. §1.56, it is not intended to constitute an admission that any individual reference referred to herein is prior art to the invention disclosed and claimed in the above-identified patent application.

Each reference listed herein may be accompanied by an explanation of its relevance. While this explanation is believed to generally reflect the contents of the references which the undersigned believes a reasonable examiner might consider relevant and material to the examination of the above-identified patent application, it is not intended that the examiner rely on the description as unfailingly accurate or complete. A copy of each reference is enclosed for the express purpose of providing the examiner with an opportunity to perform an independent

evaluation to arrive at an independent assessment of its relevance and materiality, if any, to the claimed subject matter.

Cited Art

Pursuant to 37 CFR 1.97, applicants are bringing to the attention of the Examiner all the art cited in the parent case 08/760,412 which, by preliminary amendment amending the specification in the instant case to claim the priority of said parent case and rely on it for an earlier filing date under 35 USC Section 120.

The first references cited are from an office action from the U.S.P.T.O. Dated 09/02/98 on Patent Application No. 08/760,412. PTO-892 form is attached.

Eight (8) references are cited from the Information Disclosure Statement sent to the U.S.P.T.O. on Patent Application No. 08/760,412 on March 11, 1998. Copies of Form PTO-1449 and the Information Disclosure Statement are attached.

Three (3) references are cited from the Information Disclosure Statement sent to the U.S.P.T.O. On Patent Application No. 08/760,412 on October 1, 1997. Copies of Form PTO-1449 and the Information Disclosure Statement are attached.

Nine (9) references are cited from the Information Disclosure Statement sent to the U.S.P.T.O. On Patent Application No. 08/760,412 on June 14, 1997. Copies of Form PTO-1449 and the Information Statement are attached.

Fifty-six (56) references are cited from the Information Disclosure Statement sent to the U.S.P.T.O. On Patent Application No. 08/760,412 on May 21, 1997. Copies of Form PTO-1449 and the Information Statement are attached.

INFORMATION DISCLOSURE STATEMENT

Sir:

Pursuant to 37 C.F.R. §§1.97-1.98, the undersigned would like to make the following prior art references of record in the above-identified patent application. The undersigned believes that these references may be material to the examination of this application and in respect of which there may be a duty to disclose in accordance with 37 C.F.R. §1.56.

While this Information Disclosure Statement may contain material information pursuant to 37 C.F.R. §1.56, it is not intended to constitute an admission that any individual reference referred to herein is prior art to the invention disclosed and claimed in the above-identified patent application.

Each reference listed herein may be accompanied by an explanation of its relevance. While this explanation is believed to generally reflect the contents of the references which the undersigned believes a reasonable examiner might consider relevant and material to the examination of the above-identified patent application, it is not intended that the examiner rely on the description as unfailingly accurate or complete. A copy of each reference is enclosed for

the express purpose of providing the examiner with an opportunity to perform an independent evaluation to arrive at an independent assessment of its relevance and materiality, if any, to the claimed subject matter. This art has been previously cited in a prior U.S. parent application Serial No. 08/616,071; Filed 03/14/96 so no copies of this art are submitted herewith.

Cited Art

Pidgeon, Jr. et al., U.S. Patent 4,912,721, Filed Apr. 29, 1988, Patent Issued Mar. 27, 1990:

This important patent describes a system for sending digital data on a cable TV system using direct sequence code division multiple access. The patent discloses synchronized generation of pseudorandom noise sequences which are multiplied by the data to be spread in an exclusive OR gate. The result is then multiplied by a carrier in another exclusive OR gate. A microprocessor controls the power output of the final stage power amplifier and turns the carrier oscillator on and off and controls generation of the PN sequence. The microprocessor also supplies the data to be spread to the first exclusive OR gate.

Beyers, II et al., U.S. Patent 5,235,619, Filed March 20, 1990, Patent Issued Aug. 10, 1993:

Teaches a system for upstream communication from multiple users on a cable TV system to a billing computer process at the head end using code division multiple access. Billing information for events purchased by a subscriber is collected in this manner. Upstream data is sent by selecting a plurality of data channels over which to send upstream data, selecting a plurality of times to transmit at least one of which is random for transmitting over the plurality of channels, and transmitting the data message over each of the plurality of data channels at the transmit times.
